

***Choose Australian-processed stainless steel***

*For true **reliability**, **confidence** and **quality***

## ***Only dedicated stainless steel service centres***

*When Australian businesses and manufacturers use locally processed stainless steel, the benefits go well beyond supporting our domestic economy.*

At Midway Metals, we are proud to be Australia's preferred choice for top-quality stainless steel that's fit for purpose and always on schedule – to deliver confidence that's second to none.

Our national network of service centres enables fast and flexible processing of high-performance stainless steel for different specifications and applications.

We have spent decades investing in advanced technology to cut, slit, polish and coat coils and

sheets to match your needs. In fact, we have the only dedicated stainless steel coil service centres in Australia.

Our premium products, services and equipment are backed by an expert team who make it easy to choose the right solution – for consumer goods and commercial kitchen equipment to laser-cutting, metal fabrication, construction, mining and public utilities.

At Midway Metals, we're here to help Australian industries to shine, so they can deliver world-class products and projects. Why would you choose anything else?

# *The benefits of choosing a local leader*

## *Supply certainty and continuity*

Our national network of warehousing, processing and delivery facilities mean you can access a complete stainless steel solution without delay – whatever the project size or complexity. It's reassurance that Australian industry needs more than ever.

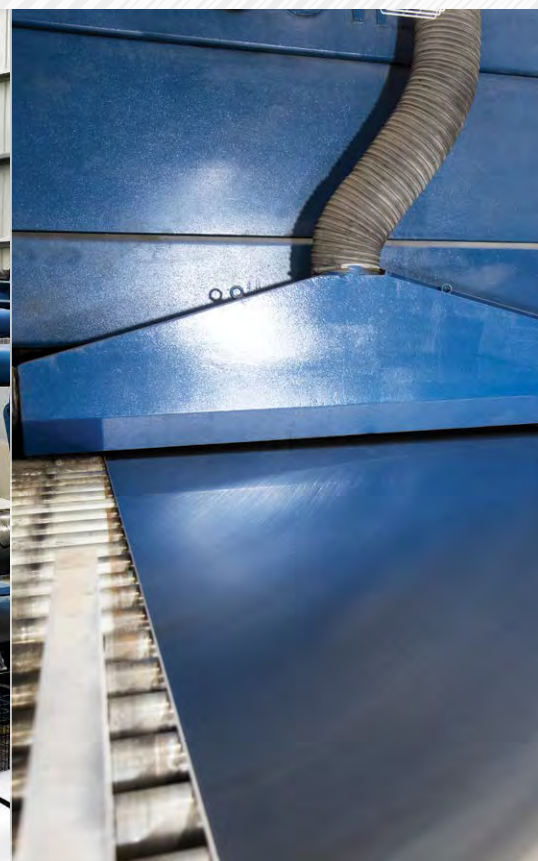

## *Real accountability*

We source stainless steel from our network of carefully selected and audited mills, and process it in our own facilities. We are fully accountable, accessible and meticulous across the entire supply chain, from mill to you.

## *Fast turnaround and just-in-time delivery*

Seamless project management, dedicated local processing facilities and our own transport fleet means shorter lead times and on-schedule fulfilment every time.

### ***Exceptional quality***

Incredible technology and experienced hands combine to produce the highest quality stainless steel, processed to meet specific requirements.

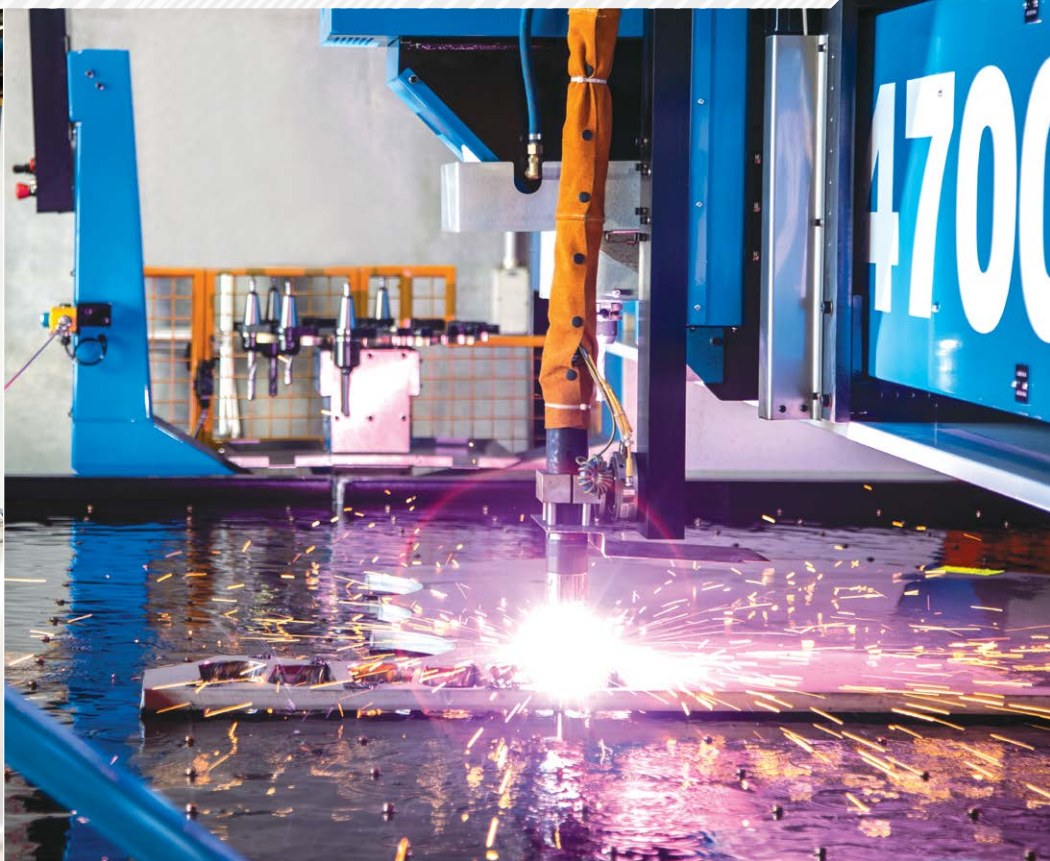

### ***Easier innovation***

Looking to design, develop and supply new products to the Australian market? Local processing injects the easy flexibility you need with experienced know-how, technical advice and genuinely personal service.

### ***Stainless steel inventory***

Through our well-stocked warehouses and fast, precise processing capabilities, we help clients reduce waste and more confidently manage their stainless steel inventory by maintaining lower stock.

# Processing flexibility, at your fingertips

*Our local processing facilities mean Australian industries have the stainless steel materials and products they need, when they need them.*

You can access a full range of top-quality solutions through one supplier – processed to various lengths, widths, thicknesses, finishes and grades plus superior sheet flatness.

## ***We process and produce:***

- sheets
- plates
- coils
- slit bands
- polished sheets and coils – no.4, low RA and enhanced brush
- flat bars.

## ***In addition, we***

- plasma cut and drill plates to size
- band saw cut long products to length
- manufacture plate flanges to AS2129, AS4087 and other standards on our CNC machines.
